

Province of Nigeria

4 April

Here in Nigeria 190 cases have been confirmed as of today 4th April 2020.

Out of the confirmed cases Nigeria has recorded 2 deaths and have discharged 20 from hospital after being cured.

Many states are on lockdown so as to minimize the spread. For this reasons activities are on stand-still. The students are sent home and following lessons online through government programs.

No brother in the province has been confirmed infected.

We are doing everything possible to maintain the instructions of the WHO so as to avoid being infected.

This period has offered the brothers to be closer to their communities as they share quality time together.

We continue to pray for the intervention of God to cure the world of this disease.

Br. Vincent Abadom, Provincial
